SYSTEM OF TIME

System Of Time is a cinematic sound library for KORG KRONOS / NAUTILUS. Its 39 playable programs span Motion Textures, Pads & Atmospheres, Synths & Leads, Bass Sounds. Every sound is designed for immediate musical use and expressive transformation through aftertouch, ribbon, vector control, modulation and the two assignable panel switches.

INSTALLATION

1. **Create a backup**
   Before installation, back up your own User data. Use Save All in MEDIA mode when required.

2. **Copy the library to USB**
   Copy the complete library, including PCG, KSC and sample files, to a USB drive. Do not change the folder structure.

3. **Open the USB drive**
   Press MEDIA on the instrument, select the USB drive and open the library folder.

4. **Load the PCG file**
   Select Neural Fields.PCG and choose Load. The Program bank is prepared for USER-G by default. Existing content in that bank will be overwritten.

5. **Load the sample data**
   Load the supplied KSC file. When a selection window appears, activate the sample data belonging to the library.

6. **Configure Auto-Load**
   Under GLOBAL > KSC Auto-Load, add the library KSC file so the samples load automatically after power-on.

> Menu names may vary slightly between instruments and operating-system versions. Keep all library files together in their original folder. When displays differ, refer to the Operation Guide for your KORG instrument.

REAL-TIME CONTROLLERS

The sound list shows which controllers are received by each program. Their musical effect can vary from sound to sound.

Aftertouch

Additional pressure after the initial strike can control movement, filter, volume or vibrato, depending on the program.

Ribbon

Horizontal finger movement can alter pitch, timbre or effect parameters.

Vector Control

The vector joystick blends internal sound components or controls assigned parameters.

Modulation

Receives general MIDI controllers for additional movement and expressive variation.

Switch 1

Program-specific assignable switch. The exact assignment is shown in the sound list.

Switch 2

Program-specific assignable switch. The exact assignment is shown in the sound list.
